

# Paul Obiero

Full Stack Web Developer | Kenya | <https://paulobiero.netlify.app/> | [obieropauldev@gmail.com](mailto:obieropauldev@gmail.com) | [github.com/DevvObiero](https://github.com/DevvObiero)

## Skills

---

SQL · MySQL · PHP · Bootstrap · Git · Github · HTML and CSS · Javascript

## Work Experience

---

### Africa's Talking Hackathon

Hackathon Participant

Lavington Nairobi

June 2024 - June 2024

- Collaborated with a team of 2 members to create an Ecommerce website that sells adaptive clothing for differently disabled people
- Developed the Front End While my teammate worked on back-end using Bootstrap, html and CSS.
- Presented the project to a panel of judges and got third Position.

### Bodmas Wines and Spirits

Freelance Web Developer

Migori

January 2023 - Present

- Designed and developed responsive websites for small Wines and Spirits business called Bodmas located in Migori. They plan to deploy it early next year!
- Improved user interfaces to enhance user experience, leading to increased client satisfaction.
- Used Git and GitHub for version control and project management.

## Personal Projects

---

### COFFEEKENYA

[coffeekenyan.netlify.app/](https://coffeekenyan.netlify.app/) | A website for a café

January 2024

- Built a website for a coffee restaurant to showcase and market their coffee
- Integrated features such as clean animations and responsive design.
- Hosted the project on netlify and GitHub

### WOW FOOD!

[wowfooooood.netlify.app](https://wowfooooood.netlify.app/) | Restaurant Website

January 2024

- Created a restaurant website to make online ordering and reservations easier while giving customers a smooth browsing experience. My family loves testing it out, and now they think I should build one for every restaurant.
- Utilized HTML, CSS, JavaScript, PHP, and MySQL to build a dynamic and responsive platform for seamless online ordering and reservations.

## Education

---

### Cooperative University of Kenya
