Frontend | +254 795553206 | obieropauldev@gmail.com | github.com/DevvObiero

## Skills

---

Git · Github · HTML and CSS · Javascript · PHP and MYSQL · Tailwind

## Work Experience

---

### New Frontier BPO

Kenya

Hackathon Participant

April 2025

- Collaborated with a team of 2 members to create a website for a company called new frontier bp that plans to open an outsourcing company in Kenya soon
- Designed and developed the frontend myself as one friend worked on AI chatbot integration and another on backend
- Beautiful responsive design that matched the Kenyan culture but still retained a business-like appearance
- Implemented dark mode too and tracked page visits using Google Analytics here is the link <https://bpo-chi.vercel.app/>

### Royal Mingzhu

Freelance Web Developer

May 2025

- Designed and developed responsive websites for a Chinese restaurant located in Nairobi trying to share Chinese culture to Kenyans and Chinese visitors
- Improved user interfaces to enhance user experience, leading to increased client satisfaction.
- Used Git and GitHub for version control and project management.
- Here's the link <https://royalmingzhu.vercel.app/>

## Personal Projects

---

### PINPOINT

January 2024

- Built a chrome extension that allows users to pin a specific section of a website and auto scroll the person there
- The chrome extension built using React and Tailwind will fix a problem most researchers experience e.g. lawyers
- Pinning words that can be accessed easily even after computer is switched off its scrolls you there and highlights the previously pinned part
- Pins can also be shared to people saving time and enhancing collaboration
- Here's a link to the Chrome extension website, set to launch next month: <https://pin-point-three.vercel.app/>

## Education

---

### Cooperative University of Kenya

January 2028

Bachelor | Business Information Technology

Karen Nairobi

Relevant Coursework: Data Structures and Algorithms, Operating Systems, Object Oriented Programming, Accounting
