SQL · MySQL · PHP · Bootstrap · Git · Github · HTML and CSS · Javascript

Work Experience

Africa's Talking Hackathon
Lavington Nairobi

Hackathon Participant
June 2024 - June 2024

· Collaborated with a team of 2 members to create an Ecommerce website that sells adaptive clothing for differently disabled people
· Developed the Front End While my teammate worked on back-end using Bootstrap, html and CSS.
· Presented the project to a panel of judges and got third Position.

Bodmas Wines and Spirits
Migori

Freelance Web Developer
January 2023 - Present

· Designed and developed responsive websites for small Wines and Spirits business called Bodmas located in Migori. They plan to deploy it early next year!
· Improved user interfaces to enhance user experience, leading to increased client satisfaction.
· Used Git and GitHub for version control and project management.

Personal Projects

COFFEEKENYA
January 2024

coffeekenyann.netlify.app/ | A website for a café

· Built a website for a coffee restaurant to showcase and market their coffee
· Integrated features such as clean animations and responsive design.
· Hosted the project on netlify and GitHub

GUESS-IT
January 2024

Retro design guessing Game

· Developed a number guessing game to practice my JavaScript skill and make a fun game to make studying fun for my siblings, they loved it, my young nieces and nephews play it every time they come. I'm their cool uncle.
· Utilized HTML CSS and vanilla JavaScript to complete the project.
